## HUWA-SAN TR50

Discover the benefits of **Huwa-San TR-50** for your livestock. This powerful solution **eliminates biofilm** and prevents regrowth, so your drinking water system won't be clogged. Guarantees **optimum water quality** for your animals and promotes better distribution of essential nutrients such as vitamins and acids. Huwa-San TR-50 **prevents the spread of disease**, improves your animals' well-being, improves feed conversion and reduces mortality rates.

It can also play a crucial role in reducing the use of antibiotics. User-friendly and versatile, Huwa-San TR-50 also optimises water use and is quick and easy to measure.

The Huwa-San TR-50 works in **all types of drinking water**, whatever the source.

## Economical consumption, **visible results**

Huwa-San TR-50 offers **quality performance** that can be effectively **measured** by water analysis and by monitoring the disease and mortality rates of your livestock.

This product is effective against a **wide range** of viruses, yeasts, fungi, bacteria (including myco-bacteria and bacterial spores) such as **Clostridium** and **amoebae**, thus contributing to an environment for your pets.

Huwa-San TR-50 is **eco-friendly** and contains no harmful substances, contributing to **sustainable farming** and respect for the environment.

The product is completely **tasteless and odourless**, so it won't affect your animals **water intake**.

Thanks to its **low dosage**, Huwa-San TR-50 is extremely economical to use, offering a **cost-effective** solution per cubic metre of water consumed.

Huwa-San TR-50 is a hydrogen peroxide-based biocide recognised as **PT2, PT3** and **PT4**. In France, it is also recognised for **PT5**.
